

KARAN SHUKLA

Frontend Developer · React.js · TypeScript · Next.js · React Native

New Delhi, India | shuklakaran107@gmail.com | +91-9354336427 | github.com/Sh-karan27 | linkedin.com/in/shkaran27

SUMMARY

Frontend Developer with 1+ year of production experience in React.js and TypeScript, shipping features across an HRMS platform, a multi-role clinic dashboard, and a React Native mobile app. Comfortable with the full component lifecycle — REST API integration, performance tuning, and APK release. Writes clean, testable code and adapts quickly in Agile teams.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript
Frontend	React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS, Responsive Design, Cross-Browser Compatibility
State Mgmt	Context API, React Hooks (custom & built-in), RBAC, Protected Routes
Backend	REST API Integration, Node.js, Express.js, JWT Authentication, bcrypt, MongoDB
Performance	SSR, Lazy Loading, Code Splitting, Lighthouse Optimization, Intersection Observer API
Testing	Unit Testing, Manual QA, Postman, Chrome DevTools
Tools	Git, GitHub, Vite, VS Code, Gradle, APK Build & Release, Agile / Scrum

EXPERIENCE

Frontend Developer · Engage HRMS

Mar 2025 – Present

- Built and maintained a shared React.js + TypeScript component library across 3 client configurations of a production HRMS, reducing repeated UI work per new feature.
- Wrote a custom useObserver hook (Intersection Observer API) to defer REST API calls until components enter the viewport — measurably cut network requests on heavy dashboard pages.
- Added background GPS tracking to a React Native (WebView) app using the Geolocation API, removing a third-party SDK dependency and shrinking APK size.
- Optimized a Next.js marketing site with SSR and lazy loading; Lighthouse score improved from the low-60s to the high-70s over two sprint cycles.
- Fixed 15+ bugs across parallel feature branches, adding prop-type contracts to prevent recurrence of the same regression class.
- Handled keystore setup, Gradle config, and signed APK generation for the first production mobile release independently.

React Developer Intern · Vidya Intern Hub

Dec 2024 – Mar 2025

- Built a clinic management system (TypeScript + React.js) with 3 role-based dashboards (Admin / Doctor / Patient), each scoped to its own data and actions.
- Implemented route-level RBAC using Context API auth state and React Router guards, preventing unauthorized access without per-route backend checks.
- Extracted repeated UI patterns into an atomic component library, cutting new-screen assembly time significantly across 10+ dashboard views.
- Replaced CRA with Vite, reducing cold-start dev server time and enabling HMR across the project.

EDUCATION

Bachelor of Computer Applications (BCA)

Jul 2020 – Jul 2023

Guru Gobind Singh Indraprastha University · CGPA: 7.9 / 10

Relevant Coursework: Data Structures, Web Development, Databases, Software Engineering
